

Campus Management System

Matushri Ahilya Devi Institute of Management and Research (MAIMR)

About MAIMR : MAIMR is an Institute of SIDDHI VINAYAK EDUCATION SOCIETY. The society was registered in the year 1997 with the aim to start various educational institutes in the field of Teachers Education, Technical Education, Nursing Education, Medical Education, Pharmacy Education and particularly in the field of Managerial Education to cope with the increasing demand for Managers, Pharmacist, Technicians and Medical pupils of the next century.:

Case study :

The college had been expanding rapidly, with a growing student body and an increasing number of teachers. All of this was putting an enormous burden on the college's paper-based document management system & causing a Communication gap between various stakeholders. Managing the students' complete records was also a difficulty for them. The number of filing cabinets were growing at an alarming rate and occupying an ever larger area., Other paper based systems including a sluggish purchase order approval process were also affecting the college's performance.

The college wanted a complete management platform that is easy to install, reliable, and scalable. It had to support existing work processes and future developments.

Serosoft investigated their difficulties & helped them by providing a complete and customized solution through Academia - Institute Management System. Academia, being a powerful and affordable institute management system, enabled MAIMR to centrally manage the flow of documents, report & other activities throughout the college to provide users with instant access to information. It delivered central security control enforcing all document access and editing rights. Academia is also now part of the MAIMR's learning environment and is enabling efficient and faster access to a range of learning materials. Information is available instantly from anywhere in the college, or from home for all the stakeholders.
