

Re: The Implementation of Seresoft's Academia ERP at AIT

I am delighted to share with you our implementation experience of Academia ERP from Seresoft. This Note is submitted without reservation and Seresoft has been a key element in automation of some of the aspects of AIT's admissions and examination system and its processes through implementation of Academia ERP. The staff of Seresoft has been energetic and dedicated in approach and have been very instrumental in assisting AIT to identify how to strengthen our processes.

During Academia implementation, a key factor for success was a component developed by Seresoft Solutions Pvt Ltd. which automated the migration of the student data from our legacy system to Academia ERP. They also assisted us in streamlining our examination process; AIT is now capable of handling examination process very easily. Academia ERP has helped us in managing our fees by providing no. of reports that helped us in tracking the outstanding amounts, collections and many more. Lastly, it was right decision taken by us to go with Academia ERP.

I strongly recommend Academia ERP to any higher education institutions.
