We recommend Serosoft

Hello, my name is **Mahesh Sanghavi** and I am **SPOC** (Single Point of Contact) at **SNJB Group of Institutes, Chandwad, Nashik** and I want to write briefly about our experience of using Academia ERP. We use Academia ERP to manage and automate all our processes (Enquiries, Admission, Registration, Fees, Time table, Attendance, Examination, Library, HR etc.) across all fronts. Academia ERP has proved very helpful to us because it has allowed various stakeholders to easily manage their data, review it from time-to- time and pull out the necessary reports as and when required.

Like any other institute, we were a bit sceptical and worried about how Academia ERP would be going to manage the detailed processes and how will the current faculties, students and other stakeholders of different departments will adapt to this change. But I'm happy to say that the features and the product detailing of Academia offered us more than what we had expected, and since all the work can now be done easily and in lesser time, it got highly appreciated by all the stakeholders as well!

Apart from being a great product, the after-sales support provided by the team at Serosoft is really great which makes the complete process very smooth and hassle free. I would strongly suggest Academia to any educational body who are looking to automate, streamline and simplify their complete processes.
