We recommend Serosoft

The Sports Gurukul

Hello, my name is Ms. Neelam Babardesai and I am Head - Curriculum, Training & School Program at The Sports Gurukul and I want to talk briefly about our experience of using Academia ERP. We use Academia ERP to manage and automate all our Student Report printing process. Academia ERP has proved very helpful to us because it has allowed our Operations team to collate the student data, set up assessment, record the assessment results and print the mark sheets of students across schools.

Though Academia has been an established product for usage in a single or group of schools (having similar operations), ours was a unique implementation wherein we had to do the setup for different schools, each working differently, for printing student reports. Initially there were many hiccups, but now I'm happy to say that we have implemented this feature in most of our schools. The report generation work can now be done easily and in lesser time, it got highly appreciated by all the stakeholders as well!

Apart from being a great product, the after-sales support provided by the team at Serosoft is really great which makes the complete process very smooth and hassle free. I would strongly suggest Academia to any educational body who are looking to automate, streamline and simplify their processes.

Neelam Babardesai

Head, School Program.
