---

The International Institute of Information Technology Bangalore, a deemed university, established in 1999 with a vision to contribute to Information Technology through education, research, entrepreneurship and innovation. The autonomous institution has consistently been at the forefront of IT education and innovation. It follows a broad academic philosophy with the 3-tier approach of programs, courses, and teaching.

In the wake of the digital transformation of our institute, we chose Academia by Serosoft to ease our day to day academic management tasks. The software has been helping us to manage our processes in a seamless and hassle-free manner; every single day. We are very satisfied with its admissions, programs & courses and examinations modules among other modules. Academia helped us to deal with the challenges of student course enrollment, transcript generation, and other functional challenges. We are able to provide easy access to students, faculty and other users via exclusive online portals and mobile apps. We have been using Academia for more than 3.5 years that has been a noble and satisfying journey. As we look to implement many other modules that are part of the product, we are looking forward to many more successful years of this relationship.

On behalf of IIITB user community, I thank Serosoft for its product (Academia) and I would in particular commend its highly professional and dynamic customer-focused management and support team. I am very happy to attest Academia by Serosoft as a package containing comprehensive solution to meet virtually every need of higher educational institutions.

A handwritten signature in blue ink, reading 'R. Chandrashekar Ramanathan', is positioned above the typed name.

Prof. Chandrashekar Ramanathan  
Professor and Dean (Academics)
